

THE CLEAR AND EASY SOLUTION TO CONDENSATION CONTROL

Dripstop[®] has become the world's best-selling **condensation control** product by being a **faster**, **cheaper** & **more durable solution**.

Condensation control Efficient solution, protects belongings and structures

DurableAdds an additional layer of protection to your steel

Reduces risk of falling while walking on top of insulation on the roof frame

Saves time & money no labor cost to install – arrives at the job site already installed

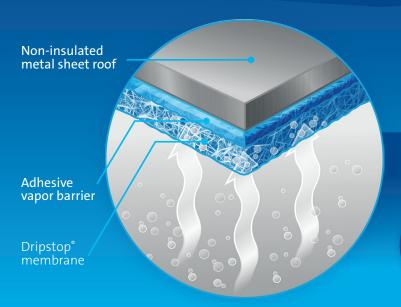

Fight Condensation Without Insulation

Don't go to the time and expense of laying down insulation and a vapor barrier when you are just trying to stop condensation.

Whatever your need, get in touch and we'll be happy to assist. Phone: (937) 660-6646, E-mail: info@dripstop.com

How Dripstop® works?

When climate conditions cause condensation to occur, Dripstop® absorbs and holds that moisture in specially designed pockets in the membrane. When climate conditions go back above the dew point, the moisture is released back into the air as normal humidity.

Tried and tested product

Areas of use

- ✓ Post Frame/Agricultural Buildings
- ✓ Steel Buildings
- ✓ Self-Storage
- ✓ Workshops/Unattached garages
- ✓ Open Walled Structures like carports/truck and RV storage

Advantages

- ✓ Saves half the time on the roof arrives at the job site already on the steel
- ✓ Saves labor costs no paying to install insulation
- ✓ Easy to work with in all types of weather can be installed even in windy conditions
- ✓ **Tried and tested solution** over 550 million sq. ft. worldwide yearly

Where decking/liner panel is installed below a pitched metal roof and insulation is blown in.

Dripstop®prevents condensation from damaging insulation and pooling on metal.

What Are Builders Saying About Dripstop®?

"I have never had one complaint... We have done over 300 buildings and I have been back to 75 - 100 and they all love it."

--- Ohio builder ---

"We have had no complaints, no dripping, no issues, customers seem to really like it..."

--- Illinois builder ---

"With double bubble or insulation, you take twice as much tirne. You have to lay down the insulation, and then you have to lay down the steel."

--- Minnesota builder ---
